

Lockhart Shire Council

Development Servicing Plan for Sewerage Services

August 2018

Lockhart Shire Council

Services	Council provides the essential sewerage services to a population of 1,800 in the Lockhart Local Government Area, in the Riverina region in NSW.
Vision	Provide an environment where people may enjoy a quality of life to which they aspire.
Mission	Provide leadership and meet the community's needs in an equitable and inclusive way that enhances the area's environmental, social and economic qualities.

Development Servicing Plan for Sewerage 2018

Adopted by Council

20 August 2018

Document Control

Revision	3	Date	7 August 2018
Prepared by	WaterOz Pty Ltd; A.B.N. 28 612 790 833 Email: gidi@wateroz.com.au ; Telephone: 0448 480 200		
Author	Alessandra Razera		
Reviewer	Gidi Azar		
Audited by	Angela Dwyer, Hunter H2O		
Audit date	20 April 2018		
Document	LSC_DSP_Rev3		

EXECUTIVE SUMMARY

This Development Servicing Plan (DSP) covers sewerage developer charges for the areas serviced by Lockhart Shire Council (LSC). The service areas are shown in the maps in Appendix A.

This document comprises one sewerage DSP. The developer charges per equivalent tenement (ET) and the proposed cross-subsidy are summarised in the table below.

Sewerage Service Areas	Calculated Developer Charge	Adopted Developer Charge	Cross-subsidy: Resulting Increase in TRB
Lockhart	\$2,541	\$1,362	\$63
The Rock	\$21,064		
Yerong Creek	\$72,883		

LSC will determine the ET loadings of new development and redevelopment and levy developer charges by multiplying the ET loadings by the charge per ET.

The DSP has been prepared in accordance with the 2016 Developer Charges Guidelines for Water Supply, Sewerage and Stormwater issued by the Minister for Lands and Water, pursuant to section 306 (3) of the *Water Management Act, 2000*.

The assets that will serve the areas covered by these DSPs are described in section 5.

The levels of service to be provided by Council are included in section 6.

Developer charges relating to this DSP will be reviewed after a period of 4 to 8 years. In the period between any review, developer charges will be adjusted annually on the basis of the movements in the CPI for Sydney, excluding the impact of GST.

The developer shall be responsible for the full cost of the design and construction of water supply and sewerage reticulation works within subdivisions.

Background information containing all the critical data are included in the background document (Appendix B)

1 INTRODUCTION

Lockhart Shire Council (LSC) provides sewerage services within the Lockhart Local Government Area in NSW.

Developer charges cover part of the cost of providing sewerage infrastructure to new development and redevelopment. Developer charges have two related functions:

- ❑ They provide a source of funding for infrastructure required for urban development
- ❑ They provide signals regarding the cost of urban development thus encouraging less costly forms and areas of development

Section 64 of the *Local Government Act 1993* enables a local government council to levy developer charges for water supply and sewerage. This section refers to Section 306 of the *Water Management Act 2000*. Outline of relevant legislation is provided in Appendix C.

A DSP is a document which details the water supply and/or sewerage developer charges to be levied on development utilising a water utility's water supply and/or sewerage infrastructure.

This DSP document has been prepared in accordance with the 2016 Developer Charges Guidelines for Water Supply, Sewerage and Stormwater issued by the Minister for Lands and Water, pursuant to section 306 (3) of the *Water Management Act, 2000*.

This DSP document supersedes any other requirements related to sewerage developer charges for the areas covered by this DSP. This DSP document takes precedence over any of Council's codes or policies where there are any inconsistencies relating to sewerage developer charges.

This document covers sewerage developer charges in regard to the three service areas served by LSC.

This DSP aim to achieve the following objectives:

- ❑ Allow Council to require a monetary contribution for the provision of sewerage services, proportional to the demands generated by development.
- ❑ Facilitate the provision of sewerage assets to meet the levels of service.
- ❑ Detail the contribution rates and Council's payment policies.

This DSP was prepared using 2016/17 data. The calculated charges where adjusted using 2016/17 Sydney CPI of 2.2% pa to arrive at the calculated developer charges in 2018/19.

2 GLOSSARY

Below is a list of some terms used in DSPs.

Abbreviations	Definitions
Asset	An asset (or part of an asset) including land and headwork's assets that directly provides, or will provide, the developer services to developments within the DSP area for which the Developer Charge is payable
ADWF	Average dry weather flow. One of the design parameters for flow in sewers.
Capital Charge	Capital cost of assets per ET x Return on Investment (ROI) factor
Capital Cost	The current replacement cost (MEERA basis) of assets used to service the development
CPI	Consumer Price Index
Developer Charge	A charge levied on developers to recover part of the capital cost incurred in providing services to new development and redevelopment
Development Area	That part of a water utility area covered by a particular DSP. Also referred to as a DSP Area
DPI Water	Department of Primary Industries Water. The regulator of LWUs.
DSP	Development Servicing Plan
EP	Equivalent Person
ET	Equivalent Tenement
Guidelines	2016 Developer Charges Guidelines for Water Supply, Sewerage and Stormwater, available from http://www.water.nsw.gov.au/___data/assets/pdf_file/0011/663698/2016-Developer-Charges-Guidelines.pdf
LEP	Local Environment Plan
LGA	Local Government Area
LSC	Lockhart Shire Council
LWU	Local water utility (NSW), a local or county council operating as water utility. In this document LWU has the same meaning as a council operating under the <i>Local Government Act 1993</i>
MEERA	Modern Equivalent Engineering Replacement Asset
N/A	Not Applicable
NPV	Net Present Value
OMA	Operation, maintenance and administration (costs)

Abbreviations	Definitions
Post Asset	An Asset that was commissioned on or after 1st January of the specified year or that is yet to be commissioned
Pre-Asset	An asset that was commissioned by a water utility before 1st January of the specified year
PS	Pumping Stations
PV	Present Value
Reduction Amount	The amount by which the capital charge is reduced to arrive at the developer charge. This amount reflects the present value of the capital contribution that will be paid by the occupier of a development as part of future annual charges
ROI	Return on investment. Represents the income that is, or could be, generated by investing money
Service Area	An area serviced by a separate water supply and sewerage system, a separate small town or village, or a new development of over 500 lots (Note: this is standard terminology from the Guidelines)
STP	Sewage Treatment Plant
TBL	Triple Bottom Line. TBL reports are annual performance report issued by DPI Water.
TBA	To be Advised
TRB	Typical residential bill, which is the principal indicator of the overall cost of a water supply or sewerage system. It is the bill paid by a residential customer using the utility's average annual residential water supplied per connected property, and is not a pensioner

3 ADMINISTRATION

3.1 DSP Name and Areas Covered

Table 1: DSP Name and Areas Covered

Sewerage DSP Name	Areas Covered
Lockhart	Lockhart, The Rock and Yerong Creek

The basis for defining the DSP area boundaries is as follows:

- ❑ Lockhart Water Utility has less than 2,000 connected properties, therefore LSC is entitled to agglomerate the three service areas.
- ❑ The post-agglomeration capital charge is lower than the pre-agglomeration capital charge

The areas covered in this DSP are shown in the maps in Appendix A.

3.2 DSP Boundaries

3.3 General

This DSP apply to all land in the LSC LGA that is within the sewerage service areas and will be connected to the sewerage systems after development (subdivision and/or building) or redevelopment (change of use).

These include connection of land with existing residences and/or non-residential building if sewerage developer charges have not been paid previously, or where redevelopment will increase the demand on the sewerage infrastructure.

3.4 Development outside the Boundaries of the DSP

If a development occurs outside the boundaries of the DSP, Council may:

- ❑ Prepare a new DSP for the new development; or
- ❑ Extend the boundaries of this DSP to cover the additional areas; or
- ❑ Enter a special agreement with the developer.

Payment for specific assets that may be required to service the new development will be in accordance with the out-of-sequence development provisions in the Guidelines.

3.5 Application of Developer Charges

Developer charges apply to all building and development activities where Council determines that such activities increase the demand for sewerage services, whether or not such activities require development consent.

When assessing the developer charges applicable to a development or redevelopment, LSC will assess the additional demand that the proposed development will place on the relevant sewerage systems in terms of ETs and will levy developer charges proportional to the number of ETs.

One ET represents a detached residential dwelling. The minimum demand for each development is 1 ET. The developer charges will be levied on all land within the DSP areas for new development and redevelopment (i.e. change of land use).

LSC applies a \$6,500 charge for pumping pit in Low Pressure System Area of The Rock, see map in Appendix A. This is an additional charge to the developer charge defined in this document.

3.6 Out-of-Sequence Development

The provisions of Section 4.3.6 of the guidelines apply to this DSP.

3.7 Indexation of Developer Charge

The developer charges will be adjusted on 1 July each year, starting on 1 July 2019, based on movements in the Consumer Price Index (CPI) for Sydney as published by the Australian Bureau of Statistics.

3.8 Payment of Developer Charges

Developer charges will be determined and levied in accordance with the provisions of this DSP document at the time of considering an application for a compliance certificate under section 305 of the *Water Management Act 2000* or a construction certificate under section 109 of the *Environmental Planning and Assessment Act 1979* or at the time of issuing a notice or other form of written advice, e.g. under the SEPP (Exempt and Complying Development Codes) 2008.

The time limit for payment of developer charges will be included in the notice of determination or will be advised to the developer by a separate notice. The amount of any developer charges not paid within the specified time limit will lapse. Any subsequent determination of developer charges will be made in accordance with Council's DSP current at the time of the determination.

3.9 Developer Charges for Crown Developments

Crown developments for essential community services (e.g. education, health, community services, and law and order) are generally exempt from general developer charges. LWUs may charge these developments only for that portion of the direct connection cost (e.g. for a lead-in main) relating to the Crown development.

Under sections 306 (4) and (5), of the *Water Management Act 2000*, the Minister for Planning may make a determination in regard to developer charges levied on Crown developments.

3.10 Dispute Resolution

Disputes will be resolved in accordance with the provisions of Section 2.9 of the Guidelines. LSC is not a member of the Electricity and Water Ombudsman (EWON)..

3.11 Review of DSP

This DSP shall be reviewed after 4 to 8 years. If appropriate, a new DSP, or DSPs, will be prepared at that time that will replace this DSP.

A shorter review period is permitted if a major change in circumstances occurs.

4 DEMOGRAPHIC AND LAND USE PLANNING INFORMATION

4.1 Current Sewerage ETs and ETs Projection

The basic unit of measure to quantify the loading on a sewerage system is an equivalent tenement (ET). One ET represents the equivalent demand or loading from a detached residential dwelling.

LSC's sewerage services are divided into three service areas. The sewerage ETs in Lockhart, The Rock and Yerong Creek are estimated as a ratio of the metered average dry weather flow (ADWF) in each sewerage treatment plant and the ADWF design capacity of each system multiplied by the occupancy ratio.

At the time of the calculations the best available data was 2016/17 inflow records. The estimated number of sewerage ETs in 2016/17 are shown in Table 2.

Council's adopted growth rate for the three service areas is 0.8% p.a. Sewerage ETs projections are shown in Table 3.

Table 2: Estimated Sewerage ETs

Service Areas	Total annual inflow (kL) (2016/17)*	Estimated daily ADWF (kL/d)	ADWF design capacity (L/EP/d)**	Occupancy ratio***	2016/17 ETs
Lockhart	85308	234	227	2.2	468
The Rock	45829	126	240	2.5	209
Yerong Creek	6036	17	261	2.9	22

Yerong Creek	18	22	23	24	25	26	27	28

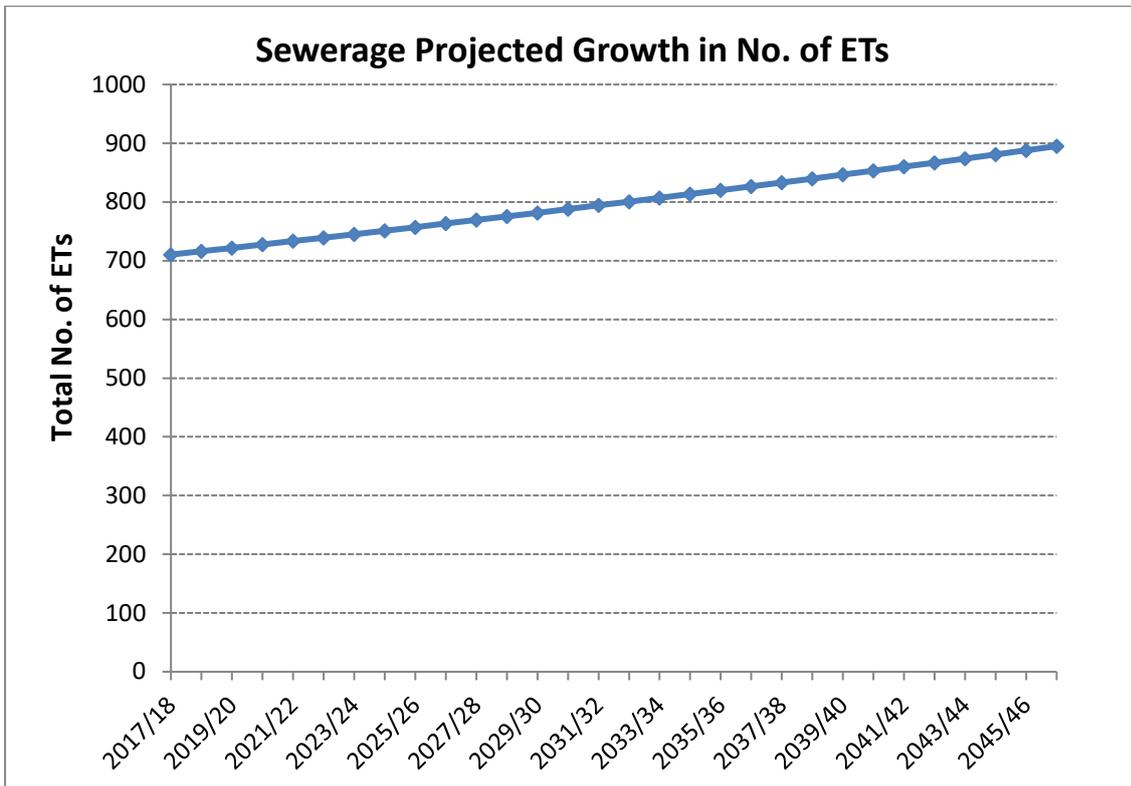

Figure 1: Sewerage Serviced ETs Projection

4.2 Land Use Information

This DSP for sewerage should be read in conjunction with the Local Environment Plan (LEP), Development Control Plan (DCP) and other planning instruments used by LSC.

5 INFRASTRUCTURE

LSC operates three sewerage systems. These DSPs include three sewerage service areas as listed below.

- ❑ Lockhart
- ❑ The Rock
- ❑ Yerong Creek

5.1 Existing Assets

All the existing assets serving LSC sewerage service areas are included in the capital charge calculations except for the following:

- ❑ Assets that are more than 30 years old at the commencement of the DSP
- ❑ Reticulation assets which are typically paid for by developers. Reticulation assets are defined as the local pipes connecting individual properties

The existing assets servicing the areas covered by the sewerage DSP are listed in Table 1 of Appendix B (LSC 2018 DSP Background Document for Sewerage). A summary of the existing assets is provided in Table 4.

Table 4: Sewerage Existing Assets

Service Areas	Current Replacement Cost (2017/18 \$'000)	
	All Existing Assets	Existing Assets Included in DSPs*
Lockhart	\$7,409	\$860
The Rock	\$7,386	\$2,470
Yerong Creek	\$1,179	\$900

Note: Assets valuation exclude contingencies.

*Excluding reticulation and 30-year old assets

Source: Existing Assets Register Final (4Dec17)

5.2 Future Capital Works Program

According to the Guidelines, the calculation of capital charge includes capital cost for new works planned within the next 10 years, excluding reticulation. If Council has developed detailed plans beyond 10 years, capital cost of those items can be considered for the capital charge calculation. In this DSP, 10 years of new works are included in the calculations.

Capital works for renewal planned within the next 10 years may be included if the existing asset is older than 30 years and/or have been removed from the asset register. For this DSP it has been assumed that the capital works for renewals are assigned to assets older than 30 years and are therefore included in the calculation.

The 10 year capital works program required to provide sewerage services to the LSC sewerage service areas are provided in Table 2 of Appendix B (LSC 2018 DSP Background Document for Sewerage). The capital works program is based on the analyses and methodology used in LSC's Asset Management Plan and it was recently reviewed as part of 'Lockhart Sewerage Business: Capital Works and Financial Plan' completed in April 2016. Estimates on the capital works program include contingencies

A summary of sewerage capital works program is provided in Table 5.

Table 5: Summary of Sewerage 10 Year Capital Works

Service Areas	Estimated Cost (2017/18 \$'000)		
	Renewals	New Works	Total
Lockhart	913	41	954
The Rock	869	1,150	2,019
Yerong Creek	179	0.8	180

Source: 2016 Lockhart Sewer Capital Works Plan Version 1.1

The 10 year capital works program for sewerage is shown in Figure 2. Timing of works and expenditure are to be reviewed and updated when required.

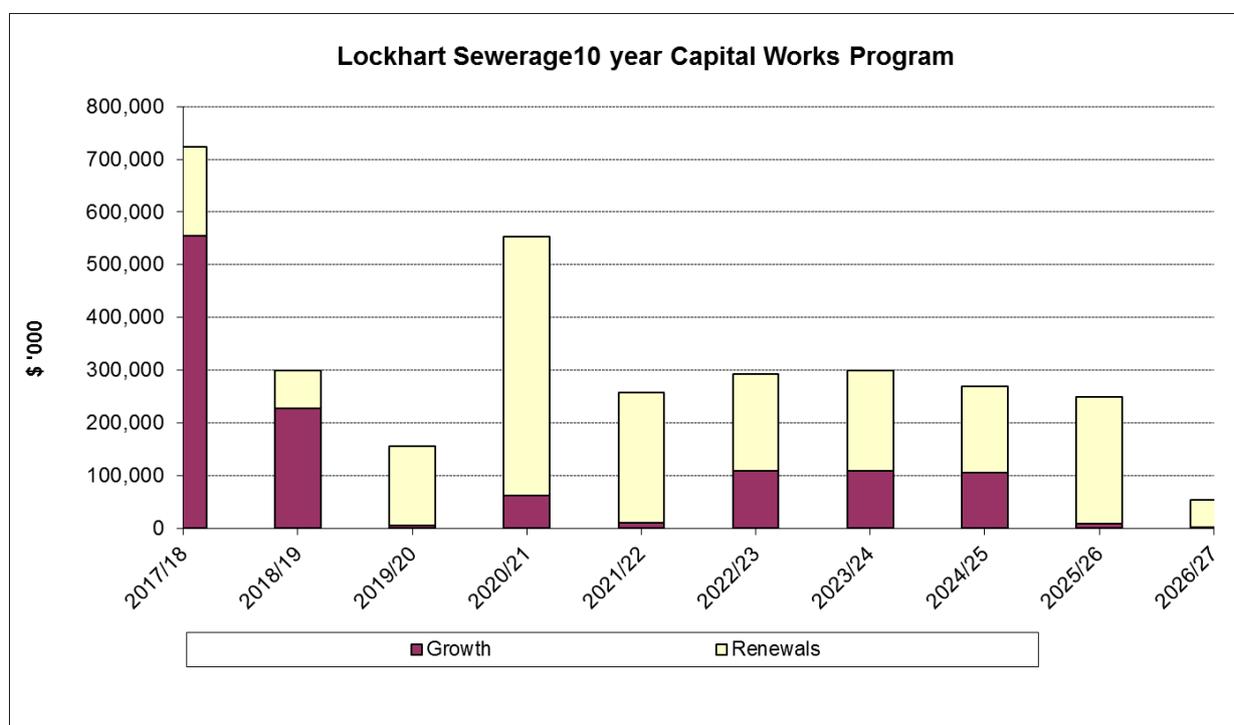

Figure 2: LSC Sewerage 10 Year Capital Works Program

6 LEVELS OF SERVICE

The Levels of Service are the targets, which Council aims to meet; they are not intended as a formal customer contract.

LSC's targets for sewerage levels of service (LOS) are listed in Table 6. Council has not carried out any research on customer expectations. This will be investigated for future updates of the asset management plan. Source: Lockhart Shire Council Sewerage Services Asset Management Plan, Version 2 Draft, May 2013.

Table 6: Levels of Service for Sewerage

Key Performance Measure	Level of Service Objective	Performance Measure Process	Desired Level of Service	Current Level of Service
COMMUNITY LEVELS OF SERVICE				
Quality	Odour Free sewerage Scheme. Sewerage Scheme does not pollute the environment	Level of odour complaints Compliance with Licence requirements	0 pa 100% compliance	Occasional complaints from Yerong Creek re private pumps 100% compliance
Function	Sewerage Scheme collects and disposes of wastewater	Service requests for chokes and surcharging	<5 pa	5
Safety	Does not exposes community to health hazards	Incidence of substandard effluent being discharged to environment	0 pa	0
TECHNICAL LEVELS OF SERVICE				
Operations	Pump stations regular cleaning STWs inspected and cleaned Records of operations	Regular washing down and inspection Regular inspections and cleaning Emptying grease traps Testing and recording of inflows and outflows	Weekly for each pump station Weekly for each STP Daily Biannually	Weekly Weekly Weekly Weekly

Key Performance Measure	Level of Service Objective	Performance Measure Process	Desired Level of Service	Current Level of Service
		Testing of effluent quality		
Maintenance	Reactive maintenance is completed Programmed maintenance of pumps Programmed maintenance of STWs	Compliance with agreed time frames Pumps checked and repaired Maintenance program completed	Response in less than 2hrs Annually Annually	
Renewal	Renewal of elements before unacceptable failure rate	Maintenance Costs	Maintenance costs remain static or decrease	Maintenance Costs remain static
Upgrade/New	Compliance with higher environmental and health requirements	Compliance with Environmental and health requirements	100% compliance	100% compliance

7 DESIGN PARAMETERS

Investigation, design and construction of sewerage components are based on the following:

- ❑ Council's levels of service (Refer to section 6 above)
- ❑ Manual of Practice: Sewer Design (1987)
- ❑ Manual of Practice: Sewage Pumping Station Design (1986)
- ❑ WSAA Sewerage Code of Australia - WSA 02-2002
- ❑ WSAA Pressure Sewerage Code of Australia - WSA 07 - 2007
- ❑ Lockhart Shire Council Sewerage Services Asset Management Plan, Version 2 Draft, May 2013.

8 DEVELOPER CHARGES METHODOLOGY

8.1 Timeline

Figure 3 illustrates the timeline of the DSP calculation, including the discounting of existing assets, future assets and ETs.

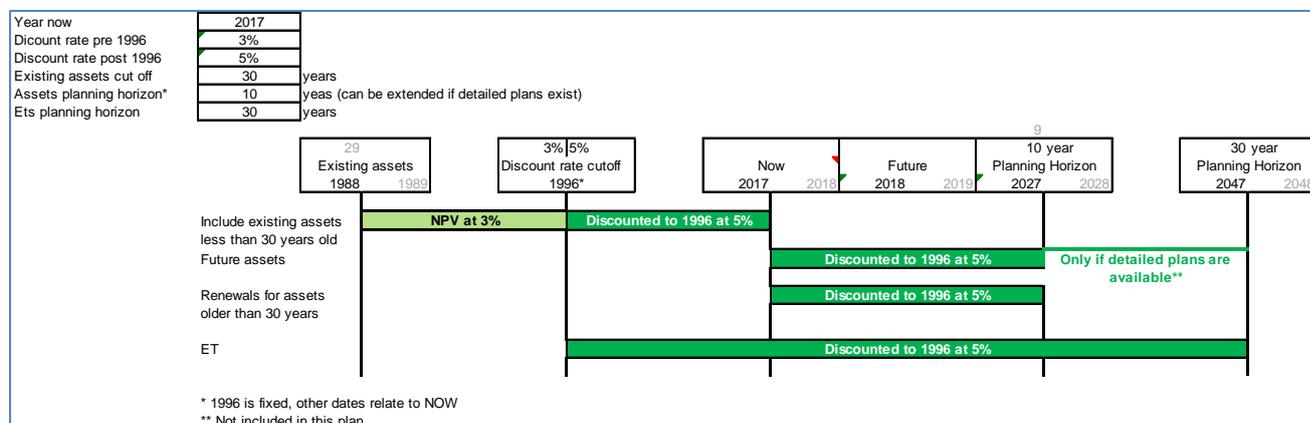

Figure 3: DSP Calculation Timeline

8.2 Capital Charge

The capital charges are calculated for LSC’s sewerage service areas based on the existing and future assets providing the services to the service areas. The capital charge is calculated per ET by dividing PV of effective capital cost of the assets by the PV of number of new ETs.

Effective capital cost is the percentage of capital cost utilised by the post 1995/96 new ETs.

The outcomes of sewerage capital charges calculations are provided in Table 3 in Appendix B and summarised in section 9.

Generally, the capacity of an asset would not be fully utilised until some years after construction of the asset. The capital charge calculation takes account of the period to full take-up of the capacity of the asset.

The Return on Investment (ROI) is based on the holding cost of early investment and recovery of the cost over time. The annual payments have to provide a return on the investment to reflect the discounting of future payments. In accordance with IPART’s Determination 9, 2000, the capital charges are calculated based on the discount rates listed in Table 7.

Table 7: Discount Rates Used in the Capital Charge Calculation

Assets	Discount Rate
Pre-1996 assets	3% pa
Post 1996 assets	5% pa

8.3 Exclusions

The developer charges do not cover the costs of reticulation and assets more than 30 years old.

LSC does not levy charges for the construction of reticulation pipework upon completion of the development.

8.4 Reduction Amount

The reduction amount represents the portion of the cost of assets that LSC expects to recover through its annual bills to the new developments.

Council has adopted the Net Present Value (NPV) of annual bills method to calculate the reduction amount. This method calculates the reduction amount as the NPV of 30 years net income from annual charges (revenue from annual bills less OMA) for the development area.

8.5 Developer Charges

Developer charge is the capital charge minus the reduction amount. The outcomes of sewerage developer charges calculations are included in section 9.

8.6 Levying Lower Charges

In setting the developer charges, LSC may consider financial, social and environmental factors to determine a level of developer charges that is balanced, fair and meet Council's objectives.

Council resolved to adopt developer charges that are lower than the calculated developer charges. LSC adopted sewerage developer charges is provided in section 9.3.

Adopting developer charges that are lower than the calculated amount means that existing residents subsidise new development. The extent of this cross subsidy needs to be disclosed in the DSP.

9 SEWERAGE DSP

9.1 Scope

The sewerage services are divided into three service areas. The boundaries of the sewerage service areas considered in this DSP are shown in Appendix A.

9.2 Capital Charge

All the existing assets (excluding more than 30 years old assets and reticulation) and new capital works (10 years) required to provide sewerage services have been included in the capital charge calculation.

The percentage of capital cost of assets utilised by new ETs after 1995/96 are considered for the capital charge calculation. The calculated capital charges for each service area are summarised in Table 8 and Table 9. Detailed calculation is provided in Table 3 of Appendix B.

Table 8: Sewerage Effective Capital Cost

Service Areas	Capital Cost (2017/18 \$'000)		Percentage of Capital Cost Utilised by ETs after 1995/96	Effective Capital Cost (2017/18 \$'000)	
	Existing Assets	10 Year Future Capital Works		Existing Assets	10 Year Future Capital Works
Lockhart	861	954	34%	293	324
The Rock	2,470	2,019	34%	840	687
Yerong Creek	899	180	34%	306	61

Note: Calculation rounding errors may be applied

Table 9: Sewerage Capital Charge

Service Areas	PV of Effective Capital Cost (2017/18 \$'000)		PV of new ETs		Capital Charge per ET (2017/18 \$)
	Pre-1996 Assets	Post 1996 Assets (existing + future)	@3%	@5%	
Lockhart	1,096	309	100	69	4,455
The Rock	207	536	45	31	21,931
Yerong Creek	-	224	5	3	69,169

Note: Calculation rounding errors may be applied

9.3 Developer Charge

Where the capital charges of two or more service areas are within 30%, they are agglomerated into a single DSP. Council resolved to levy the same charge to all three service areas, resulting in the amalgamation of the three service areas to a single DSP.

Developer charge is the capital charge minus the reduction amount. Developer charge detailed calculation is provided in Table 4 in Appendix B.

The reduction amount calculation methodology is provided in section 8.4 and the calculation is provided in Table 5 of Appendix B.

Year	Total ETs	New ETs	PV Factor	PV of new ETs (@5%)	Cumulative new ETs	Net income from new ETs	PV of Net income from new Ets (@5%)
2017/18	705						
2018/19	710	6	1.00	6	6	\$1,081	\$1,081
2019/20	716	6	0.95	5	11	\$2,170	\$2,066
2020/21	722	6	0.91	5	17	\$3,268	\$2,964
2021/22	728	6	0.86	5	23	\$4,374	\$3,779
2022/23	733	6	0.82	5	29	\$5,490	\$4,517
2023/24	739	6	0.78	5	35	\$6,615	\$5,183
2024/25	745	6	0.75	4	40	\$7,748	\$5,782
2025/26	751	6	0.71	4	46	\$8,891	\$6,318
2026/27	757	6	0.68	4	52	\$10,042	\$6,797
2027/28	763	6	0.64	4	58	\$11,203	\$7,222
2028/29	769	6	0.61	4	65	\$12,373	\$7,596
2029/30	775	6	0.58	4	71	\$13,553	\$7,924

2045/46	881	7	0.27	2	176	\$33,762	\$9,043
2046/47	888	7	0.26	2	183	\$35,113	\$8,957
2047/48	895	7	0.24	2	190	\$36,474	\$8,861
		190		100			\$ 223,370

Reduction Amount:	$\$223,370 / 100 =$	\$2,244
-------------------	---------------------	---------

LSC sewerage calculated and proposed developer charges is provided in Table 10.

Table 10: Sewerage Developer Charge per ET

Service Areas	Capital Charge	Reduction Amount	Calculated Developer Charge 2017/18	Council Proposed Developer Charge 2018/19
Lockhart	4,455	2,244	2,211	1,362
The Rock	21,931		19,687	
Yerong Creek	69,169		66,924	

9.4 Sewerage Cross-Subsidy

LSC has elected to levy developer charge lower than the calculated for the three service areas. Council elected to cap the developer charges for their small villages in order to maintain affordability, avoid 'stranded' assets in the villages and be attractive to development when compared to other towns cities in the region. The proposed developer charge is the same as the existing implemented charge.

The developer charges income difference needs to be subsidised by existing customers through annual bills (i.e. typical residential bill - TRB). To balance the difference in income from the calculated developer charge and proposed developer charge, Council will need to increase the TRB as shown in Table 11. TRB impact is graphically shown in Figure 4.

The cross-subsidy, resulting from capping of developer charges must be disclosed in the DSP, the utility’s Annual Report, annual Operational Plan and in communication materials for consultation with stakeholders

Table 11: Impact of Cross-Subsidies on Sewerage Typical Residential Bill

Option	Long term TRB (2017/18 \$)	TRB Difference	Resulting Increase in TRB
Calculated- Weighted Average Developer Charge -\$9,345	\$495*	-	
Proposed- Weighted Average Developer Charge -\$1,362	\$559	\$64	12.8%

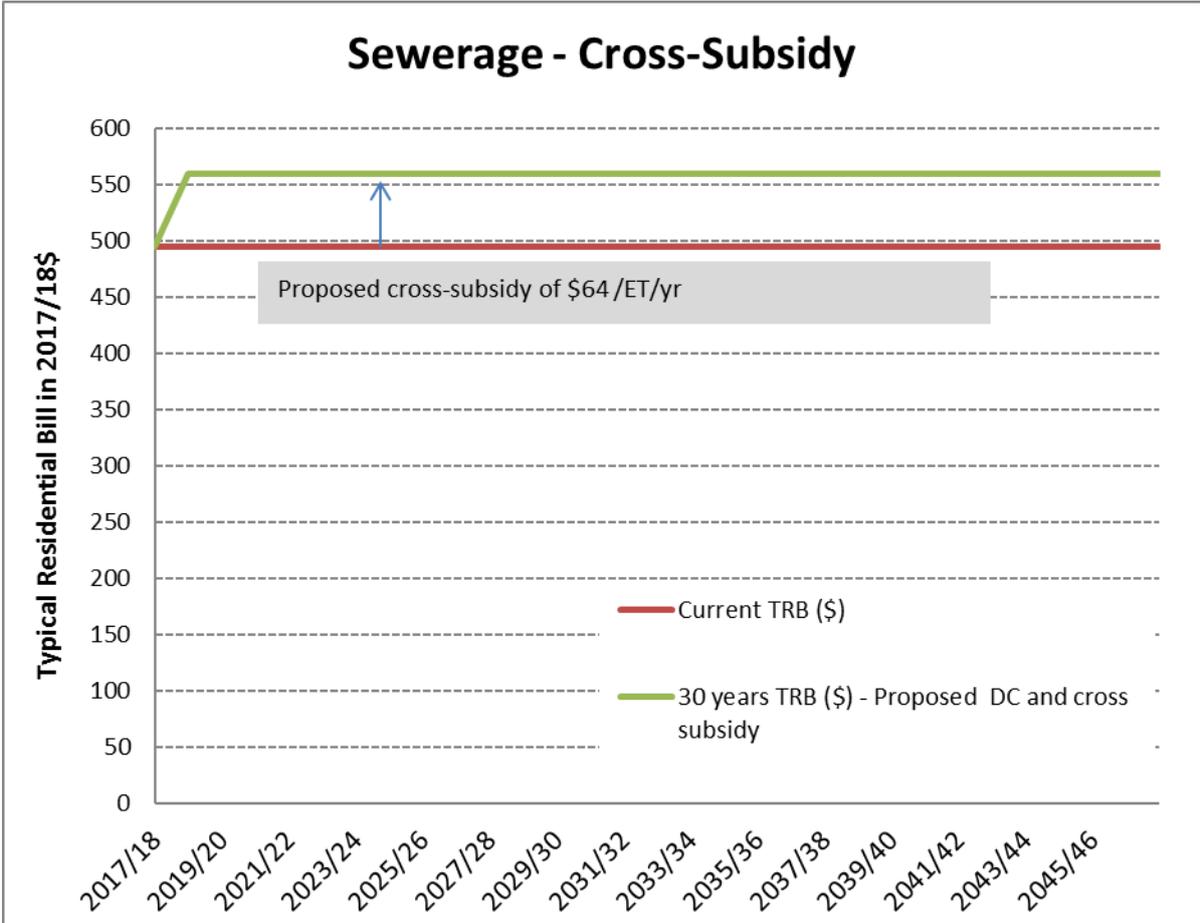

Figure 4: Impact of Lower Developer Charge on Sewer TRB

10 REVIEWING/UPDATING OF CALCULATED DEVELOPER CHARGES

Developer charges relating to these DSPs shall be reviewed by the LWU after a period of 4 to 8 years. In the period between any reviews, developer charges will be adjusted on 1st July each year on the basis of movements in the CPI for Sydney as required by the Developer Charges Guidelines (excluding the impact of GST). Developer charges will be those charges determined by Council from time to time and will be published in Council's Annual Fees and Charges.

11 BACKGROUND DOCUMENTS

Background information and calculations related to these DSPs are available in the following documents:

- ❑ Developer Charges Guidelines for Water Supply, Sewerage and Stormwater - 2016, published by Department of Primary Industries, DPI Water
- ❑ LSC 2018 DSP Background Document for Sewerage (Appendix B)
- ❑ LSC Sewerage TBL Performance Report (2015/16)
- ❑ Lockhart Sewerage Business: Capital Works Plan and Financial Plan, Version 1.2, April 2016
- ❑ LSC Special Schedules 3 to 6, 30 June 2017

Note: The background documents contain detailed calculations for the capital charges, reduction amount and developer charges, including asset commissioning dates, size/length of assets, MEERA valuation of assets, 10 years capital works program, assets current and future capacities. For copies of the background documents please contact Council's Engineering & Environmental Services Department.

12 OTHER DSPs AND RELATED CONTRIBUTION PLANS

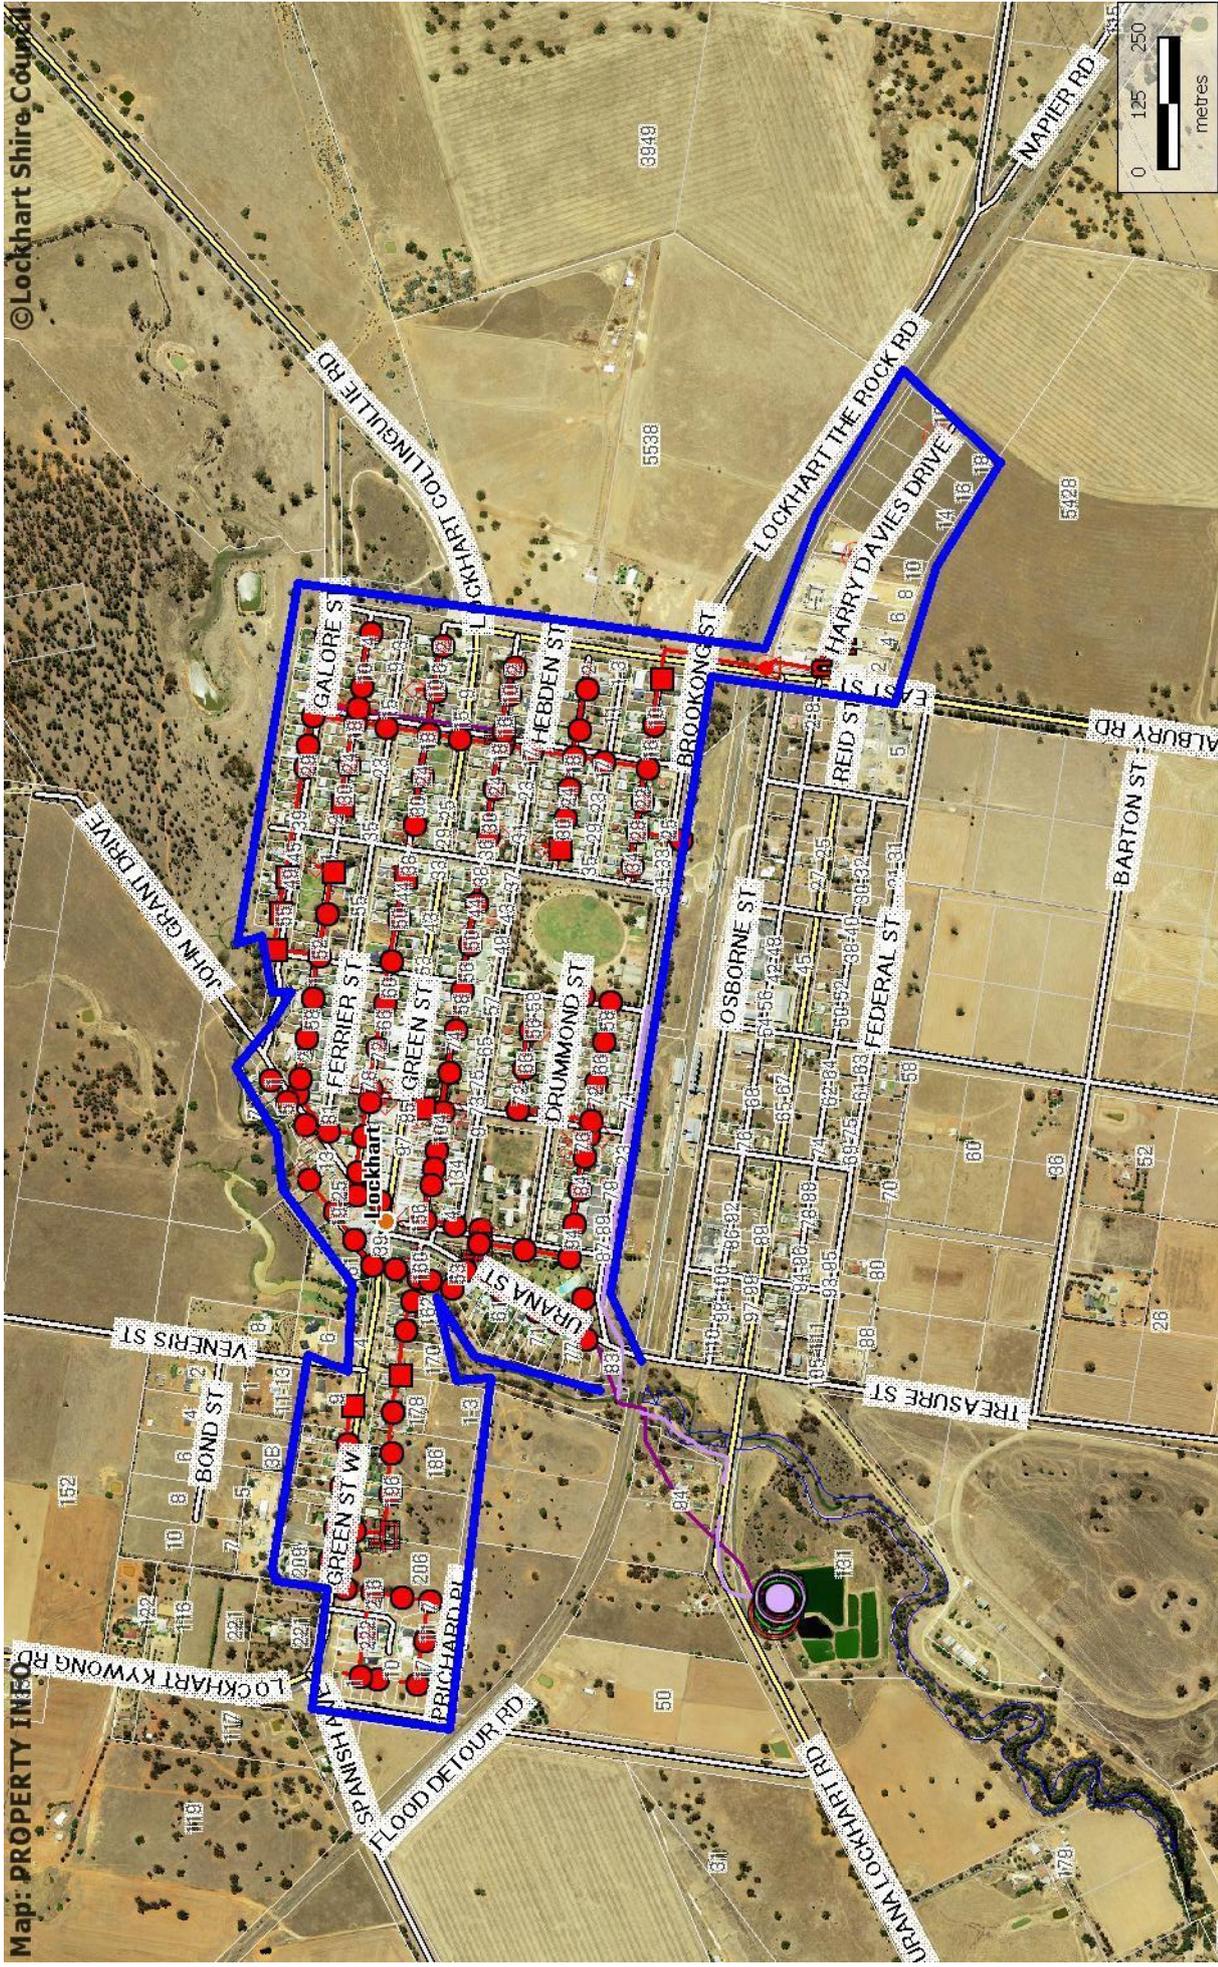

Other related plans include:

- ❑ S94 plans developed by Lockhart Shire Council

Appendix C

Outline of Legislation

(Source: Developer Charges Guidelines for Water Supply, Sewerage and Stormwater (2016))

Outline of Legislation

Local Government Act 1993

The power for local government councils to levy developer charges for water supply, sewerage and stormwater derives from section 64 of the Local Government Act 1993 by means of a cross-reference in that Act to the relevant provisions of the Water Management Act 2000.

Section 64 of the Local Government Act states that:

Division 5 of Part 2 of Chapter 6 of the Water Management Act 2000 applies to a council exercising function under this Division in the same way as it applies to a water supply authority exercising functions under that Act.

Environmental Planning and Assessment Act 1979

Prior to the introduction of the Local Government Act in 1993, councils used the provisions of section 94 of the Environmental Planning and Assessment Act 1979 to obtain developer contributions for water supply services. As part of the Local Government (Consequential Provisions) Act 1993, amendment was made to the Environmental Planning and Assessment Act so that section 94 no longer applied for water supply services.

However, Councils can levy developer charges for stormwater under either Local Government Act or Water Management Act.

Water Management Act 2000

Section 305 (1) of the Water Management Act states that:

- (1) A person may apply to a water supply authority for a certificate of compliance for development carried out, or proposed to be carried out, within the water supply authority's area.

Section 306 (2) and (3) of the Water Management Act states that:

- (2) as a pre-condition to granting a certificate of compliance for development, a water supply authority may, by notice in writing served on the applicant, require the applicant to do either or both of the following:
 - (a) to pay a specified amount to the Authority by way of contribution towards the cost of such water management works as are specified in the notice, being existing works or projected works, or both,
 - (b) To construct water management works to serve the development.
- (3) In calculating an amount for the purposes of subsection (2) (a):
 - (a) the value of existing water management works and the estimated cost of projected water management works may be taken into consideration, and
 - (b) the amount of any government subsidy or similar payment is not to be deducted from the relevant value or cost of the water management works, and
 - (c) Consideration is to be given to any guidelines issued for the time being for the purposes of this section by the Minister.

In 2011, the Minister for Primary Industries became responsible for non-metropolitan NSW town water services. The Minister is responsible for the issue of guidelines for water utilities on the calculation of water supply, sewerage and stormwater developer charges.

Note: Use of moneys raised from developer charges is discussed in section 2.7 on page 10 of the guidelines.

Local Government (Savings and Transitional) Regulation 1993

The Local Government (Savings and Transitional) Regulation 1993 covers the matter of developer contributions which had previously been obtained by councils under the Environmental Planning and Assessment Act as follows:

(9) Any monetary contribution held by a council immediately before the commencement of this Regulation, being a contribution arising from a condition:

(a) that was imposed under section 94 of the *Environmental Planning and Assessment Act 1979*; and

(b) that specifies that the contribution is to be applied towards providing specified water or sewerage services or towards providing water or sewerage services generally,

is to be applied towards the construction of works within the meaning of Division 2 of Part 3 of the *Water Supply Authorities Act 1987*, or towards the repayment of money borrowed for the construction of such works, and is not to be applied towards any other purpose.
